

BIFIPRO®

Legionella Elimination Device

Water
CONSULTING
WATER TREATMENT SYSTEMS

to manage your blue gold

*'Le Esperidi Village' has chosen the **BIFIPRO** device for its camp's water system, an innovative technology which prevents legionella without using chemicals. Bifipro was designed and developed in the Netherlands where the issue has always received a lot of attention. In Italy it is distributed by **Water Consulting**, a leading water treatment firm, which specializes in Legionella prevention. They will supervise its maintenance and undertake constant remote monitoring. By installing this system 'Le Esperidi Village' is once again proving that its mission is focused on maximising its customers' satisfaction (Certificate of Excellence Tripadvisor 2014 and 2015) and protecting the environment.*
